Experiment 9: Exploring AI-Assisted Features and Built-in Analytics (Zia) in Zoho Creator

THAVASAKTHI.S | 241401119 | B.TECH CSBS

Aim:

To explore AI-assisted application development using Zia and built-in analytics features in Zoho Creator for generating forms and visualizing application data.

Procedure

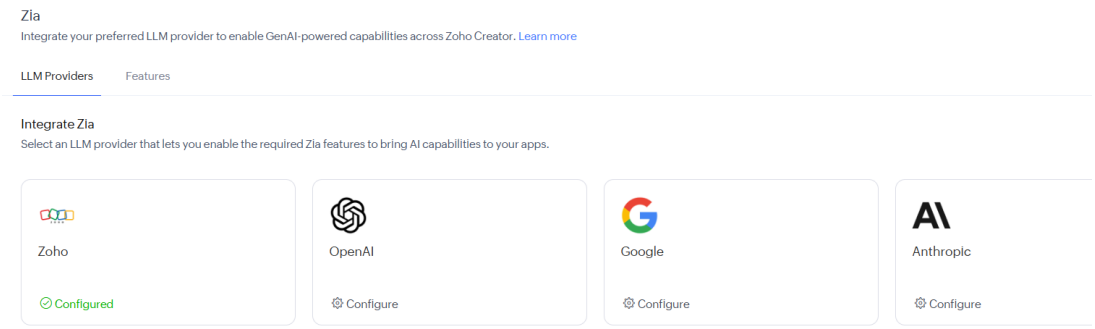

1. Open Zoho Creator

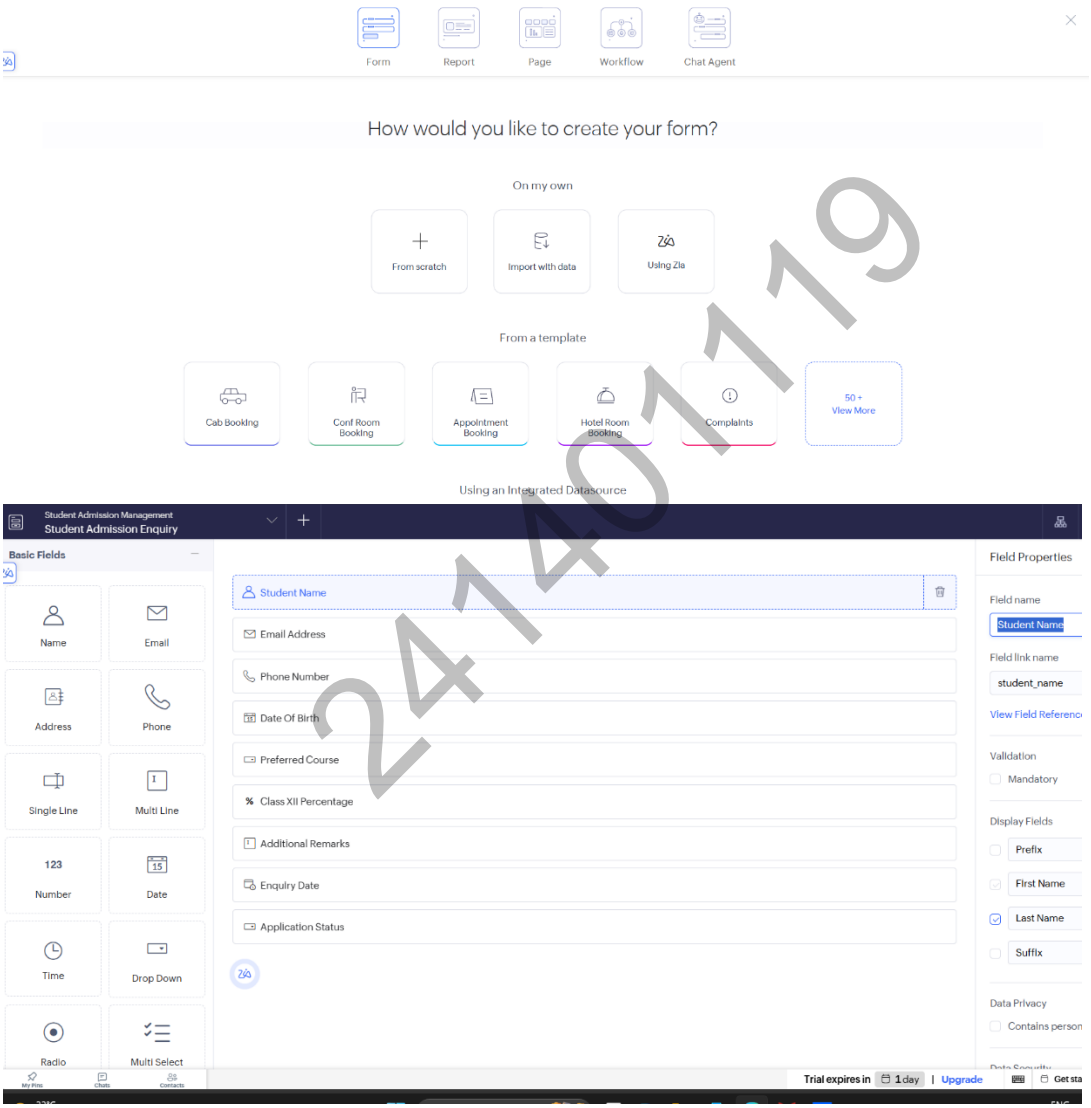

- Log in to Zoho Creator and open the Student Admission Management application.
- Enter the application's Edit mode.
- Locate the AI-assisted form creation option.

2. Generate a Form Using Zia

- Select Form → Using Zia.
- Enter a natural-language prompt describing the student admission enquiry form.
- Review the AI-generated form fields and save the form if required.

24140119

3. Explore AI-Assisted Features

- Observe how Zia interprets the user prompt.
- Examine the suggested fields and form structure.
- Review the generated output and make changes if necessary.

4. Create a Pie Chart

- Open the application editor and add or open a chart component.
- Select the admission enquiry data as the data source.
- Configure a pie chart to represent the distribution of enquiries by preferred course.

Pie - Admission Enquiry Form

5. Analyse Application Data

- Open the Admission Enquiry Report.
- Examine the submitted student records and their preferred courses.
- Use the pie chart to compare the distribution of enquiries across courses.

6. Verify the Features

- Confirm that Zia generated the form based on the provided prompt.
- Verify that the pie chart displays the admission data.
- Observe how AI-assisted development and visual analytics simplify application development and data analysis.

241401119

Result

Zia's AI-assisted form generation feature and Zoho Creator's built-in analytics capabilities were explored successfully. A form was generated using a natural-language prompt, and a pie chart was used to visualize admission enquiry data.
